Torino, Italy | Date of birth: 10 October 1999

Experience

Logistics Product S.r.l. (Reply Group) *Torino, Italy*

Software Engineer - R&D, Platform Frontend Team *Sep 2026 – Present*

- Frontend development of **LEA Reply™** (Logistics Execution Architecture), the supply chain execution platform of Logistics Product: composable business microservices covering integration, warehouse management and infrastructure monitoring, shaped around each customer's needs.
- Work in the R&D unit alongside experienced engineers, in close collaboration with the delivery teams that take the platform to customers.
- Technologies: **React**, **TypeScript**.

Politecnico di Torino | CAD - Electronic CAD & Reliability Group *Torino, Italy*

Research Fellow - ARBoard Project *Apr 2025 – May 2026*

- Developed **AR applications (Unity/C#)** for **real-time PCB debugging** on smart glasses.
- Technologies: Unity 3D, AR Foundation, MRTK3, Python, OpenCV, Machine Learning, Git.
- **Award**: Best Demo at DATE 2025. Co-author of a peer-reviewed paper presented at ISEMV 2025 (IEEE Xplore: 11327760).

Education

Politecnico di Torino *Torino, Italy*

M.Sc in Computer Engineering (Graphics & Multimedia) - 107/110 *Apr 2025*

Specialization in **XR, Computer Vision, and Machine Learning**. Focus on interactive graphics.

Politecnico di Torino *Torino, Italy*

B.Sc in Cinema and Media Communication Engineering - 96/110 *Oct 2021*

Foundation in **OOP** (Java, C++), image algorithms, and 3D modeling pipelines.

Leadership & Activities

IEEE-HKN Mu Nu Chapter (Student Honor Society) *Politecnico di Torino, Italy*

HR Manager *Mar 2023 – Jun 2024*

- Organized **recruitment for 50+ members**, managed interviews and onboarding for 2 cycles.
- Coordinated team meetings and managed **stakeholder communication** for 200+ members.

Projects

EzWh - Software Engineering Project

- Full-stack warehouse management system (WMS) web application using JavaScript. (GitHub)

GymTonic

- Demo web application for an HCI course, implementing a fitness tracking interface with JavaScript. (GitHub)

Study-Hall-Seat-Detection-System

- CV system using YOLO and OpenCV to monitor study hall occupancy via Python. (GitHub)

La Porta – Psychedelic VR Experience

- Oculus VR application featuring immersive environments. 3D development in Blender and Unity C#. (Project link)

Skills

React, TypeScript, JavaScript, C#, Python, Java, C, SQL · Unity · OpenCV · Blender · Git · Docker · Kubernetes

Languages & Info

Italian: Native | **English**: B2 (IELTS) | **Work Auth**: EU Citizen

Additional: Black Belt 1st Dan (Karate-Do) | Open Water Diver (SSI)
